Unit Economics Are Resilient Across Scenarios

FOUNDERS PROGRAM · REACH MULTIPLIER SENSITIVITY

Scenario	Patrons	Annual Cost	Net Value	ROI
Bearish (0.5x)	356	$17,602	$322,023	19.3x
BASE (1x)	**712**	**$35,204**	**$644,046**	**19.3x**
Bullish (2x)	1,424	$70,409	$1,288,092	19.3x
Viral (3x)	2,136	$105,613	$1,932,137	19.3x

KEY INSIGHT

ROI holds constant at 19.3× across all scenarios because cost and revenue scale linearly.

The Founders Plan is structurally profitable — the only variable is volume. Even at 0.5× reach (bearish case), the program generates $322K of net value on $17K of spend. There is no losing outcome.

SECTION 19 · STRATEGIC PRIORITIES

Eight Priorities From the Model

I — Lead with Founders Plan

CRITICAL

Relationships, not funnels. HNW dinners drive AGP conversion.

II — Run AGP Sign-up Campaign

HIGH

Launch accelerant in months 6–12. 2,500 signups target.

III — Hold Storage Fees at 0.5% AUC

HIGH

AUC growth outpaces storage revenue. Don't gouge.

IV — Negotiate Wholesale Spread

HIGH

Every 0.25% = pure margin at scale. Aggressive LBMA posture.

V — Don't Underspend on PSPM/PIPA

CRITICAL

Moat depends on it. Dual-jurisdiction compliance from day 1.

VI — Singapore Vault Differentiator

HIGH

Communicate relentlessly. Zero-VAT + Lloyd's is the pitch.

VII — Reinvest EBITDA 18 months

STANDARD

No distributions until Y4+. Growth compounds.

VIII — Annual Premium Drift 5%

STANDARD

Korean retail at +20–30% sets the reference ceiling.
